

PATIENT INFORMATION

Providing a urine specimen for cytology

What should I do first thing in the morning?

On waking, you should pass the first urine of the day as normal.

How much fluid should I drink?

You should then drink sufficient fluid so that you can produce another urine specimen when you attend the clinic.

What will happen when I attend the clinic?

Please attend the clinic with your bladder comfortably full, where you will be asked to produce a specimen of urine.

The best specimen is that portion of urine passed at the beginning OR end of the stream.
