Working with you, for you  
Brushing your teeth

## Brushing your teeth

Brush your teeth in the morning and at night.

You can ask your dentist for help.

# Toothpaste

Toothpaste helps to clean your teeth.

Toothpaste helps to stop your teeth going bad.

Fluoride

It is important to choose a toothpaste with a special ingredient called fluoride.

# Toothpaste

Remember to spit out the toothpaste when you finish brushing your teeth.

Don't rinse your mouth with mouthwash or water straight away.

# Sugar in Food

If you eat and drink lots of sugary things your teeth will go bad.

Don't snack on sugary food. Eat some fruit instead. There is sugar in fruit, but it does not hurt your teeth.

# Sugar in Drinks

The best drinks between meals are milk or water.

You can choose tea or coffee without sugar.

Too much fruit juice or fizzy drinks, can make your teeth go bad.

## False Teeth

After eating, fill the sink with water and rinse your false teeth in cold water to wash away any food.

To clean your false teeth, fill the sink with water. Use a denture brush and denture paste. Rinse with cold water.

Don't use toothpaste to clean your dentures.

## False Teeth

At night, soak your false teeth in a cleaner. Ask your dentist which one to use.

Fill the sink with water. Rinse your false teeth in cold water. Then put your false teeth back in.

If you don't take your false teeth out at night, take them out for 4 hours during the day.

## Things to remember!

Your dentist will tell you when you need a check up.

If your mouth is sore ask your dentist for help.

If you take medicine ask your doctor for medicines that don't have sugar in them.
