

PATIENT INFORMATION

Planning Together and Leaving a Community Hospital

Returning home or moving to another place of care

This leaflet contains the information you might need when you leave us. Please ask about anything you do not understand or if we have not included anything important to you.

What might I expect?

Early conversations – we will discuss and plan with you what will be required for you to leave hospital. We will involve your carers, family and/or friends in conversations if you would like them to be included. If you have been receiving care services before coming into hospital, speak to the ward staff as soon as possible.

‘Expected date you will leave hospital’ – you will be given an ‘expected date of discharge’ (expected date you will leave hospital) which will be reviewed during your stay.

We will support you to **recover, rehabilitate or receive end of life care** in your usual place of residence.

What matters most to you

The team caring for you will ask **‘what matters most to you?’**. Your specific needs for any ongoing support and care will be assessed and discussed with you, your family and carers, and the right support will be put together.

Why am I leaving hospital?

Our top priority is to help and support you to leave hospital when the time is right. **You will only leave when it is safe to do so.**

Why can’t I stay in hospital?

Staying in hospital for longer than necessary can have a negative impact on you, this could include reducing your independence.

You may miss your friends, family and your pets.

Our top priority is to ensure you are in the **right place at the right time** for the best care possible.

On the day you leave hospital

You will have access to your After Visit Summary (AVS) via the MYCARE app – we can print this for you if needed. If required, we will arrange medications for you to take away. Where possible we will support you to get **home for lunch**.

Transport home

Where possible, we ask that you make your own arrangements with family, friends, carers, public transport or use a local taxi firm. Hospital transport is reserved for patients with a clinical need. (Eligibility criteria for hospital transport can be provided on request.)

Medication

If you have started new medication, you will be given a supply to take home. Your GP will then prescribe more if required.

We will explain your medication to you. You will also find written instructions on the packaging which tells you how to take the medication, including frequency and time.

If you have any questions about your medicines there is a Medicines Information helpline open Monday to Friday 9am to 5pm on 01803 655304 or email tsdft.medicinesinformation@nhs.net

Follow up

If you require a follow-up appointment or investigation, we will arrange these. MY CARE holds your recent and upcoming appointments, so it's easy to check where you need to be and when, if you would still like to receive letters through the post, then you can set your communication preferences to opt-in to post.

Managing expectations before you leave hospital

Before you leave hospital, our team will work closely with you to understand your health and social care needs. If you require ongoing support, we will arrange care that is **safe, appropriate, and available to meet your individual needs**.

We will listen to your preferences wherever possible. However, please be aware that care arrangements and placements are based on **availability and suitability for your needs**, rather than personal choice or location.

We understand this may feel like a big change, especially if you are going somewhere other than your own home. Our priority is to ensure you receive the right support, and we will answer any questions to help you feel informed and supported.

Important to know

- We will make one care offer based on availability and where can meet your needs.
- If you choose not to accept this offer due to personal preference, you, your family or carers will need to make private arrangements to facilitate your discharge.

Returning home

The team caring for you will discuss transport and other arrangements with you (and your carers, family and/or friends if you wish).

Returning home with care

Supporting you to **recover, rehabilitate or receive end of life care in your own home**.

We work closely with a large number of providers who are regulated by the Care Quality Commission (CQC).

Package of care

If you are ready to return home but need some additional support, you may go home with a **package of care** commissioned with a local care provider.

Once you arrive home, the care provider will work with you to discuss your individual health and social care needs.

Once you have left hospital, you will receive a follow up phone call to see how you are settling in at home and to talk you through the assessment process. The team will also support you if you have any questions or concerns.

Community Health Services

You may be followed up by a range of different health and social care professionals depending on your presenting needs.

Short Term Services are made up by 4 teams supporting adults living in Torbay and South Devon:

- Social Care Reablement - Devon
- Reablement - Torbay
- Rapid Response - Southern
- Rapid Response - Torbay

How are short term services different to other health and social care support?

- It is a free time limited service
- You will receive intensive support from a range of health and social care staff.
- Promoting independence
- Personalised care to meet your needs.
- Care staff will support you to practise doing things on your own and make suggestions about techniques and equipment to support this.

Returning home before support is available

If you decide that you would like to leave hospital before the recommended support has been confirmed to begin, **it is important that you consider how this might impact you and the people who support you.**

It is important to be aware that **we are unable to confirm dates or times when support may be able to start.** You may wish to discuss this with your family, friends and the team looking after you in hospital. Our priority is to ensure that you receive the support that you need at the right time, in the right place.

Care in a community setting

If you are not able to return home following your stay at Hospital, you will be referred for **care in a community setting.**

Short and long term care is provided in both residential and nursing care homes. Both settings have specialist support available 24 hours a day. The type of setting recommended will be based on your individual needs and discussed with you.

If you are transferring to a care home, you will receive a follow up from the community team to see how you are settling in and to talk you through the assessment process.

Our teams will support your **recovery, rehabilitation, assessment, care planning or short-term intensive support.**

Ask ward staff supporting you about which personal items or belongings you will need to take with you. **The team will also support you if you have any questions or concerns.**

Assessments and financial matters

Anyone who is leaving our hospitals with new support services will have their care provision funded by interim health funding for a **period of up to four weeks**. This allows for an assessment of your ongoing needs outside of a hospital environment.

We know that a hospital environment is not the best place to assess what longer term support you may need, which is why we will look to complete any requested or required assessments with you once you have left hospital. **This includes both Care Act Assessments and NHS Continuing Healthcare Assessments.**

You will only begin paying for services if it is assessed that you have a longer-term support need. In this event, **you may have to contribute towards your care following a Care Act Assessment or from Day 29 following discharge**; whichever arrives soonest. As part of the assessment process you will need to take part in a **financial assessment** to identify how much you may need to contribute to ongoing care and support.

MY CARE and the NHS app

MY CARE complements the NHS app. MY CARE gives you more detailed access to your hospital and specialist community care. The NHS app gives you information about your GP care, repeat prescriptions, vaccinations and NHS 111 online.

Key benefits

Here are some of the features you'll find within MY CARE:

- **Manage your appointments:** MY CARE holds your recent and upcoming appointments, so it's easy to check where you need to be and when.
- **Get your test results:** Once your test results have arrived you can view them on MY CARE. They are clearly laid out and easy to view.

- **Share your health information:** Allow a family member or carer to access your health and appointment information by enabling Proxy Access
- **Reduce the number of letters you get through the post:** when you sign up to MY CARE we will send you most of your information digitally through MY CARE, text and email. Quicker, saving paper and keeping all your information in one place.

Who can I contact?

After you have left hospital, if you need to speak to someone, please contact:

- The hospital you have received treatment on.
- Torbay Council residents - Adult Social Services: 01803 219700
- Devon County Council Residents Care Direct Plus: 0345 1551007
- Your GP

Get the care you need No matter what the problem

Just Think 111 First
