Dear Sir/Madam

Request for Information

We are writing to confirm that we have now completed our search for the information you requested.

A copy of the information is below:

Please provide the information for financial years 2023/24, 2024/25 and 2025/26.

Where a product was bought through NHS Supply Chain or another distributor, please give the manufacturer separately from the supplier.

If all parts would exceed the cost limit, please prioritise 2, 4 and 1.

1. **For each financial year, total expenditure excluding VAT by manufacturer, for each of these categories: foam dressings; superabsorbent dressings; antimicrobial dressings (silver, iodine, PHMB, honey); alginate and gelling-fibre dressings; hydrocolloids; wound contact layers; debridement products; compression bandages and hosiery; negative pressure wound therapy (units and consumables); single-use NPWT systems.**
   Please see datasets attached

2. **For each category, the share of that expenditure bought through NHS Supply Chain, directly from the manufacturer, and through any off-prescription or direct supply scheme. For each route other than NHS Supply Chain, name the provider and give the contract start and end dates.**
   Please see datasets attached, shown in column A

3. **The 25 wound care products with the highest expenditure in 2025/26: product name, manufacturer and expenditure. Quantities are not required.**
   The attached datasets list the 25 wound care products with the highest expenditure at the top of each dataset, highlighted in blue.

4. **For NPWT: whether units are purchased, rented or placed free of charge against consumables; the provider; the contract or framework, with its start and end dates; and the number of units owned or rented at 31 March 2026.**
   Nine pumps are provided free of charge based on expenditure on consumables.

The supplier is KCI Limited. The NHS Supply Chain framework runs from October 2021 to March 2027.

Any manufacturer that replaced another in any category since April 2023: the previous manufacturer, the new one, and the date of the change.
Please see datasets attached
